

AX-TAG-B003

WIREPAS TAG

With accelerometer – Battery 1050mAh

WIREPAS TAG
Non-router and low energy
Wirepas 4 & 5 compatible

BEACON MODE
Eddystone URL
iBeacon

ACCELEROMETER
Configurable sensitivity
and detection time

ON/OFF & LED STATUS
On/Off button with led status
to activate or deactivate the tag

WEAREABLE TAG
The tag can be worn like a watch
requires an accessory

NFC
NFC type 2 tag (write/read)
With lock option

OTA
Update firmware Over-The-Air

The AX-TAG-B003 module is a part of Axones product line to implement a 3-in-1 technological solution based on a Wirepas Mesh network, which allowing indoor geolocation and navigation, assets or individual tracking and metering on the same infrastructure.

It can be quickly installed on existing equipment, or individuals with accessories to use it like a watch. Its accelerometer detects movement, vibration, allowing it to emit only when necessary (sensitivity and detection time configurable).

Technical Specifications

Power supply: 1 x CR2477 battery (1050mAh)
Radio protocol: Wirepas
Radio frequency range: 2.4Ghz
Wirepas mode: low energy // non-router
Dimension: 48x15.5mm
Weight: 23gr
Certification: CE
Warranty: 1 year

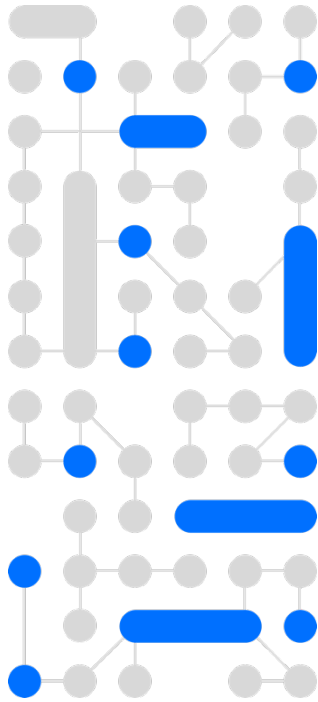

Use Cases

Asset or individual tracking (RTLS)
Vibration detection

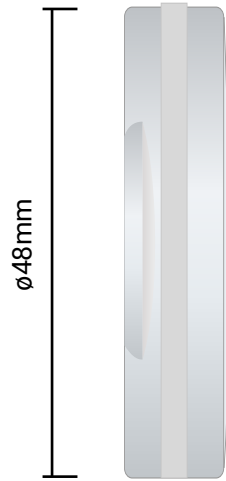

Environnement

Operation temperature: -40°c à 80°c
Protection rating: IP67

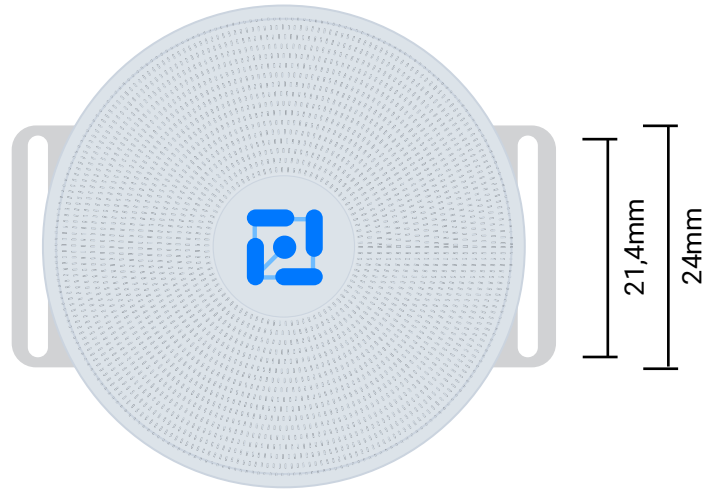

Dimensions

15,5mm

54mm
